

encrypting the unencrypted edited data using said second secret-key; and  
storing, copying or transferring said encrypted edited data and not the unencrypted edited data.

79. (Twice Amended) A data copyright management method comprising:  
adding copyright information to unencrypted data;  
encrypting said unencrypted copyrighted data using a first secret-key;  
supplying the encrypted data having the copyright information to a primary user;  
decrypting the encrypted data using said first secret-key to produce decrypted data having the copyright information;  
displaying the decrypted data;  
re-encrypting said decrypted data using a second secret-key to produce re-encrypted data having the copyright information; and  
storing, copying or transferring said re-encrypted data and not said decrypted data.
